St. Augustine Old San Juan Palm Island St. Croix

Hydro Block
Hydro-Block is an environmentally friendly hardscape product. It allows the readmission of water into the ground and the natural recharge of the aquifer by reducing or eliminating storm water runoff. This 4” x 8” permeable paver helps protect the environment from dangerous pollutants in storm water run-off. In most cases it decreases flooding and relieves sewer systems.

It is manufactured in 2-3/8” thick. LEED points are available when using this paver. (*U.S. Green Building Council)

Garden Wall
Our beautiful garden wall will enable you to turn your outdoor area into a contemporary masterpiece. The block is versatile and can be used for straight and curved walls.

Coping
We manufacture thin & thick pavers along with 4 sizes of coping.
